ACTIVE ROSTER FREEZE - FEBRUARY 23RD

SSHL RULE REFRESHER

ROSTER INTEGRITY

You should have 18 skaters (including 6 defencemen) and 2 goalies with NHL stats on your active roster at all times. If you have less than the required number of players with NHL stats available, you can use non-NHLers to fill out your active roster. If you have more than the required number of players with NHL stats available, your active roster must reflect your best possible team.

FARM TEAM ELIGIBILITY

If a player (skater or goalie) qualifies as a rookie this season, he can be protected on the farm going into next season. A player qualifies as a rookie if he has not played more than 25 games in any single preceding season, nor in six or more games in each of any two preceding seasons.

In addition, if a goalie has less than 1,000 minutes played this season, he can be protected on the farm going into next season regardless of whether or not he is a rookie.

GOALIE COMBO

Goalie combo is $(\text{WINS} \times 2) + (\text{TIES}) \times 10 - (\text{GAA} \times 100)$. For example; if a goalie has 40 wins and 10 ties and a GAA of 2.00, his goalie combo is $800+100-200=700$.

WILDCARDS

The two wildcard slots can be filled by either forwards or defencemen.

DESIGNATED HITTERS

You're able to designate one player as your DH, which means his PIMs will not count in your totals, but all his other stats will. This player can be a forward or a defenceman. If it's a defenceman, you need to designate only 5 other players as defencemen on your roster.

GOONS

Your goon's penalty minute total is subtracted from your team's penalty minute total. If your goon reaches 225 PIMs, you gain his other offensive stats in your totals as well (goals, assists, points, ppg, shg, and plus/minus).

Note that the goon slot is 'position-neutral', meaning if your goon is a defenceman, you still need 6 other defencemen on your roster.

PENALTY MINUTE RATIO

The penalty minute ratio is the ratio of all your player's PIMs divided by all their total games played.
